

Ateliers J&J – Catalogue

Fabriquants de mobilier métallique
Metal furniture manufacturers

Founded in 2012 in Brussels, Ateliers J&J is a design and manufacturing workshop specializing in tubular steel furniture.

The project was initiated by Jean Angelats, a self-taught craftsman, and joined in 2025 by Daphné Keraudren, an architect. Together, they now combine their expertise to bring to life an independent, human-scale production space.

Conceived from the outset as an artisanal and self-financed structure, Ateliers J&J brings together the disciplines of metalworking and design within a single workshop. Their production unit centralizes every stage of manufacturing in order to guarantee quality, coherence, and full control over lead times.

Specializing in outdoor furniture, Ateliers J&J offer both series collections – embodying their visual identity– and bespoke pieces, designed in close dialogue with their clients. Each project is developed with careful attention to use, proportions, and finishes.

They have collaborated on a wide range of projects and fittings, including bars, restaurants, hotels, museums, as well as private terraces and interiors. Each piece, whether unique or part of a collection, is locally produced, respecting both the aesthetic and functional requirements of the client.

Ateliers J&J are makers constantly reflecting on production processes; their technical expertise allows clients a high degree of flexibility and often pushes projects beyond initial ideas.

Their choice to sell directly, without resellers or intermediaries, fosters a relationship of trust and enables personalized support from the very beginning to the completion of each project.
